AI/ML Intern

June 14, 2024 - Present

Collaborating with a team focused on integrating Artificial Intelligence into Small/Medium Businesses.

Engaging in "Project-based Top-Down Learning" approach

Projects

Liver Disease Prediction | Python, Flask, Pandas, Numpy

- -Developed a predictive model for Liver disease using machine learning techniques, improving early detection.
- -Implemented data preprocessing, feature engineering, and selection processes to enhance model accuracy.
- -Evaluated multiple machine learning algorithms and optimized hyperparameters to achieve high performance metrics with an Accuracy of 95%

Sorting Visualizer | JavaScript, HTML, CSS

- Designed and implemented a project to visualize sorting algorithms for educational purposes.
- Developed an interactive web app that allows users to input numbers and visualize the sorting process step-by-step.
- Covered multiple sorting algorithms including Bubble Sort, Selection Sort, Insertion Sort, Merge Sort, and Quick Sort.

Technical Skills

Languages : C, Java, Python, R, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Google Colab, Jupyter Notebook, MS Office, MS Excel

Technologies/Frameworks: Scikit-Learn, NumPy, Pandas, Matplotlib

Achievements

- Achieved a top 7% rank (2326th out of 32,720 students) in a highly competitive Data Structures course.
- Solved 250+ problems on Leetcode.
- Solved 300 + problems on Code Chef.
- Solved 1000+ problems on various coding platforms.
- Consistently ranked in the top 5 out of 70 students in my class

Certifications

- SQL Basic certification By Hackerrank
- Data Structures by Smart Interviews
- Frontend Development by Simplilearn
